DELICIOUS LIGHT AND GOOD FOR THE PLANET

When life gives you lemons you can make lemonade, but then you'd have to squeeze them, take the pips out, make sure the sugar and sharpness balance is just right. Or you could always just order some refreshing Sweetbird Lemonade Syrups and focus on with making some lovely profit instead.

Buying bottles of ready to drink lemonade means shipping lots of water - which you have heaps of. With our syrups, you only ship the concentrate; each bottle making 33 12oz drinks, They also take much less space than 33 bottles of premixed lemonade and with a high perceived value they are great for profits as well as the environment.

Welcome the new addition! We pleased to be introducing brand new Pomegranate & Raspberry Lemonade syrup. As with the others, it is made with real lemon juice, with the addition of pomegranate and raspberry juice, a flavour we know is going to be a hit.

No fuss method Not only are our Lemonade Syrups highly profitable they are so easy to make. Just four pumps into a glass of still or sparkling water, topped with lots of ice and fruit is all you need. You can make up a big batch in jugs in the fridge for busy shifts, or have a glass drinks dispenser with a tap on the counter. So easy serving and a constant thirst quenching reminder to customers.
